GitHub: github.com/Harshkumarjaiswal

Email: jaiswalharshjaiswal@gmail.com
Mobile: +91 9430143755

SKILLS

Languages:	Java, C++, JavaScript, Python
Frameworks:	HTML, CSS, Bootstrap, React
Tools/Platforms:	MySQL, MongoDB, Git, GitHub, Selenium IDE
Soft Skills:	Collaborative, Adaptive, Communicative, Organized

INTERNSHIP

CELEBAL TECHNOLOGIES

June 2025-Ongoing

App modernization Intern

- **About:** Contributing to modernizing legacy applications by refactoring code, optimizing performance, and enhancing maintainability.
- **Collaborated closely with senior SDEs**, gaining hands-on mentorship in modern software engineering practices, architectural design, and best coding standards for scalable applications.

Buck Softech Private Limited, Ranchi

March 2024-April 2024

Intern

- **About:** Accomplished job training in website designing, implementing API integration that improved data retrieval speed by 30% and enhanced functionality.
- Developed dynamic and responsive applications using foundational web frameworks, ensuring mobile compatibility.
- Optimized web components, increasing user engagement and page load speed through performance improvements.
- Gained real-world experience in web development by resolving reported bugs and UI/UX optimizations, leading to increased user retention.
- Enhanced skills by implementing efficient code structures, reducing page load time and improving overall application performance.
- **Tech stack used:** HTML, CSS, Bootstrap, JavaScript, MongoDB and Rest APIs.

PROJECTS

Cloud Nest – Cloud-Based File Storage System

- Designed and developed a secure desktop application for cloud-based file storage using Java Swing/AWT for featuring a responsive, event-driven Interface.
- Implemented core features including user authentication, and file upload, download, delete, and listing, with seamless API communication via OkHttp.
- Utilized Supabase Cloud Storage for storing user files and MySQL for managing user and file metadata, integrated using JDBC, Jackson for JSON handling.
- Ensured scalability and performance, supporting files up to 100MB and handling 50 concurrent users, with secure access via BCrypt password hashing.
- Managed the project with Maven, and proposed future enhancements like JWT authentication, file sharing, versioning, and cross-platform compatibility.
- GitHub Repository Link: <https://github.com/Harshkumarjaiswal/Cloud-Storage-App.git>

Tech: Java (Swing, AWT), Maven, OkHttp, Supabase (Cloud Storage), MySQL

Buddy Fix – Crowdsourced Problem-Solving Platform

Feb' 2025

- Created an interactive platform that allows users to submit and solve problems collaboratively.
- Built a robust backend using MongoDB to manage user data and submissions efficiently.
- Integrated APIs to fetch live locations and send SMS alerts to local authorities about issues.
- Implemented an AI chatbot to assist users in problem-solving and providing real-time responses.
- Gained hands-on experience in full stack development and AI chatbot integration to enhance user interaction.
- GitHub Repository Link: <https://github.com/Harshkumarjaiswal/BuddyFix.git>

Tech: HTML, CSS, Bootstrap, NodeJS, MongoDB, APIs.

Weather Predictor:

April' 2024

- Developed a weather application using Rapid API to fetch data from various locations.
- Utilized geolocation services to provide weather details based on the user's current location.
- Enabled users to check weather conditions for any city or country dynamically.
- Optimized API requests to improve data retrieval speed and reduce latency.
- Displayed weather parameters such as temperature, humidity, wind speed, and forecast trends.
- Learned API integration and geolocation services to fetch real-time weather data dynamically.
- GitHub Repository Link: <https://github.com/Harshkumarjaiswal/Weather-App>

Tech: HTML, CSS, JavaScript, APIs.

Banking System Software:

Dec' 2023

- Applied customer account management, including deposits, withdrawals, and fund transfers with user authentication.
- Merged MySQL and MS Access for secure data storage and retrieval.
- Built an interactive UI using Java Swing/JavaFX for better user experience.
- Added administrative tools to oversee banking operations.
- Developed expertise in Java-based applications development and secure database management using MySQL.
- GitHub Repository Link: <https://github.com/Harshkumarjaiswal/Banking-System>

Tech: Java, MySQL, MS Access.

CERTIFICATES

Git and GitHub – <i>Geekster</i>	Dec' 2024
Networking Basics - <i>Cisco Networking Academy</i>	Dec' 2024
Software Engineering and Methodologies - <i>Saylor.org Academy</i>	Nov' 2024

ACHIEVEMENTS

Secured a finalist position in TRINETRA Hackathon	Feb'2025
Ranked 6th among 120+ teams for developing Buddy Fix – a crowdsourced problem-solving platform.	
Recognized as an active NSS Volunteer	June 2024
Contributed to a Slum Development Camp, leading initiatives for community service, social awareness, and upliftment activities.	

EDUCATION

Lovely Professional University	Punjab, India
<i>Master of Computer Applications CGPA: 7.44</i>	<i>Since August 2024</i>
Gossner College	Ranchi, Jharkhand
<i>Bachelor of Science in Information Technology CGPA: 8.03</i>	<i>November 2021 - June 2024</i>
ST JOSEPH'S +2 SCHOOL	Mahuadanr, Jharkhand
<i>Intermediate in Science Percentage: 65.6%</i>	<i>April 2019 - July 2021</i>
